

Dear (name of crematory/funeral home),

We are contacting you on behalf of (name of your organization)

Our organization has partnered up with Alternative Solutions USA to help raise awareness about recycling at the crematory and generate funds for our cause of (describe your cause and the essential services your organization is providing to the community).

Alternative Solutions USA is the nation's first-of-its-kind 501(c)(3) non-profit crematory recycling program organized and operated exclusively to generate financial support for funeral home/crematory's charity of choice through the recycling of orthopedic implants and dental prosthetics remaining after the cremation process at their facilities.

This **free**, award-winning, and publicly embraced recycling program embodies the legitimate wishes and rightful demands of decedent's family members, all of whom unequivocally support recycling the left behind implants of their cremated loved ones strictly for charitable purposes, and not for private gain or corporate profit.

We strongly encourage you to become part of this unprecedented program and give back to your local community by selecting our organization to be the recipient of funds generated from recycling metals remaining after cremation at your crematory or the one you work with.

Alternative Solutions USA donates the most to charity because profits generated through its recycling activities are dedicated to charity as defined in its bylaws. Also Alternative Solutions is a tax-exempt public charity that is eligible for grants, donations, and numerous discounts on products and services.

To join this program and designate funds to our organization, please call **(866) 951-6670**.

For more info, please visit **www.alternativesolutionsusa.org**

Sincerely,

(Your organization's name or person representing organization)
